Sprint 4 retrospective

Improvements

Implement machine learning model into app - this was planned for sprint 4.

More people focusing on report rather than web app, now that the web app is nearing completion.

More clearly defined issues and goals.

What went well.

Paid more attention to Jira and its child issues - more actively updating our status.

Better branching and pull requests with Git.

On track in terms of deadline.

Positive feedback from mentor meetings.

Progress made on report.
